

# Built for developers

GitHub is a development platform inspired by the way you work. From **open source** to **business**, you can host and review code, manage projects, and build software alongside millions of other developers.

GitHub for teams

## A better way to work together

GitHub brings teams together to work through problems, move ideas forward, and learn from each other along the way.

[Sign up your team](#)

### Write better code

Collaboration makes perfect. The conversations and code reviews that happen in Pull Requests help your team share the weight of your work and improve the software you build.

[Learn about code review on GitHub >](#)

### Manage your chaos

Take a deep breath. On GitHub, project management happens in Issues and Projects, right alongside your code. All you have to do is mention a teammate to get them involved.

Security and administration

## Boxes? Check.

We worried about your administrative and security needs so you don't have to. From flexible hosting to authentication options, GitHub can help you meet your team's requirements.

[Learn about GitHub for Business](#)

## Code security

Prevent problems before they happen. Protected branches, signed commits, and required status checks protect your work and help you maintain a high standard for your code.

## Access controlled

Encourage teams to work together while limiting access to those who need it with granular permissions and authentication through SAML/SSO and LDAP.

## Hosted where you need it

Securely and reliably host your work on GitHub.com. Or, deploy GitHub Enterprise on your own servers or in a private cloud using Amazon Web Services, Azure or Google Cloud Platform.

## Integrations

# Perfect the way you work

Customize your process with hundreds of integrations and an intuitive API. Integrate the tools you already use or discover new favorites to create a happier, more efficient way of working.

[Learn about integrations](#)

Sometimes, there's more than one tool for the job. Why not try something new?

## Community

# Welcome home, developers

GitHub is home to the world's largest community of developers and their projects. Whether you're making your first commit or sending a Rover to Mars, there's room for you here, too.

**21M**

Developers worldwide

Developers use GitHub for personal projects, from experimenting with new programming languages to hosting their life's work.
